PERSPECTIVES FOR 2023

EXECUTIVE DIRECTOR'S MESSAGE

The creation of ONG 3D was motivated by a desire for commitment on three levels, which today constitute the three fields of action of our organization.

In fact, its identity can be broken down into three fundamental poles:

- Democracy, which must be forged as a framework for the expression and exercise of a plural citizenship, committed and open to national and international issues.
- Human rights, which are the expression of the rule of law based on equity and the promotion of the most vulnerable populations.
- Sustainable local development, which is the most relevant level for mobilizing and engaging communities, civil society organizations and local elected representatives.

Moundiaïe CISSÉ

Today, more than ten years after its creation, we continue to work for the enhancement and reinforcement of citizen initiatives for the promotion of good governance, with respect for human rights, at both national and local levels. More specifically, ONG 3D is a major contributor to the deepening of democracy, particularly through rigorous monitoring and quality information on the implementation of public policies. On a daily basis, it works to improve the transparency and accountability of public development initiatives, and strengthens people's capacity for citizen monitoring. In this way, ONG 3D is at the heart of the most modern and decisive aspect of democracy: public decision-makers who take action and who are accountable for the use of public resources entrusted to them by the will of the people.

Although we live in an ever-changing world, faced with political crises, food shortages and the effects of global warming, ONG 3D is constantly adapting its actions to take account of these crises and better respond to the needs of populations. In fact, it's with them that we act, directly involving local communities and stake-holders throughout the process. Our action is also made possible by the involvement of all our partners, thanks to their financial and technical support.

Over the past few years, we have been able to deploy our actions in all 14 regions of Senegal to promote virtuous governance of natural resources and sustainable development, while improving access to fundamental social rights for populations, particularly the most vulnerable.

Let's all continue to work together to build a fairer, more equitable democratic society, closer to the people.

GENERAL OVERVIEW

OUR MAIN FIELDS OF ACTION

GOVERNANCE

OUR VISION

Our vision is the advent of plural, democratic societies open to the world, involved with the interests and fulfillment of their populations, both nationally and sub-regionally.

OUR VOCATION

Through a participatory and inclusive approach, our vocation is to have a significant influence on major political, economic and social transformations by supporting public authorities, at central and local levels, in the implementation of public policies geared towards promoting the rights and interests of communities.

OUR MISSION

We have set ourselves the mission of promoting and strengthening citizen action initiatives and the capacities of grassroots players to promote good governance, while respecting human rights, so that they are fully involved in socio-economic transformation and contribute to building their future.

Improving the quality of governance, the development of local authorities and citizen participation, particularly in budgetary and tax policy matters, is one of 3D's priorities. Following the adoption of the Law on the Code of Transparency in the Management of Public Finances, transposing the 2009 WAEMU Directive, it became essential to ensure that decisions taken at both state and local level are transparent, participative and fair throughout the budgetary process. Ultimately, the aim is to be able to finance quality public services that are accessible to the whole population, including the most vulnerable individuals. It is therefore essential for 3D to act at the level of the budgetary process, by establishing collaboration with the Ministry of Finance and Budget, and by strengthening the participation and capacities of local players, civil society organizations (CSOs) and citizens, including vulnerable groups.

GENDER, DISADVANTAGED CHILDREN & YOUTH

ONG 3D is resolutely committed to including in its areas of intervention the promotion of gender and social inclusion to meet the Sustainable Development Goals (SDGs). In order to ensure equal rights for all individuals, as well as an equitable sharing of resources and responsibilities between women and men, such a gender and social inclusion analysis is applied to all our interventions. This translates in particular into activities to strengthen the political and community leadership of women and young people, with an emphasis on their participation in decision-making bodies and their economic empowerment. 3D also works to promote access to essential services such as healthcare and education for the most vulnerable groups.

GENERAL OVERVIEW

EDUCATION & TRAINING

ONG 3D places education and training at the heart of its programs, in order to strengthen the knowledge, skills and abilities of its participants. Through our various projects, the training we provide enhances the knowledge, know-how and interpersonal skills of local authorities, partners and communities, particularly the most vulnerable. Through these training courses, the aim is to capitalize on the knowledge acquired in order to ensure the sustainability.

FOOD SAFETY & NUTRITIONAL SECURITY

Access to food security and the promotion of sustainable agriculture have always been among our priorities, since despite the various policies implemented by the State, hunger and malnutrition remain realities in many localities, particularly in rural areas. 3D's actions are therefore focused on strengthening agricultural production by developing and rehabilitating market garden areas, distributing equipment and inputs, and building capacity. To this end, 3D supports women's economic initiatives to develop income-generating activities, with the aim of promoting women's economic empowerment.

OUR VALUES

Our actions and operations are based on two core values: solidarity and fairness. In the name of the first value, solidarity, we are committed to defending the common interest and promoting national unity and cohesion. Equity within the organization manifests itself through the promotion of equality and justice, respect for the diversity of its members, the organizations and populations for which we undertake actions, and the territories where we implement our interventions.

WATER & SANITATION

ONG 3D mobilizes its efforts through various projects, mainly implemented in rural areas through its regional offices. 3D's support is many and varied:

- improved access and availability of water in terms of quality and affordability;
- improved access to sanitation, hygiene and health;
- participatory improvement of local climate change mitigation and adaptation policies, with a particular focus on water resources.

SUSTAINABLE & LOCAL DEVELOPMENT

If the ultimate aim of all 3D's actions is to respect and promote human rights, it goes without saying that this objective is difficult to achieve without the existence of prosperous, viable territories. This is how we understand our unwavering commitment to sustainable local development. Furthermore, these commitments are made in the context of fighting global warming.

OUR ACTIONS TOWARDS DEMOCRATIC GOVERNANCE AND ENHANCED CITIZEN PARTICIPATION

IMPROVING TRANSPARENCY AND CITIZEN PARTICIPATION IN BUDGETARY MATTERS

■ Number of projects : 6

■ Where ?

■ **Funding partners** : European Union ; International Budget Partnership (IBP) ; Oxfam ; Ayto de Vanlencia ; Agencia Extremeña De Cooperación Internacional Para El Desarrollo (AEXCID).

With a view to improving the effective implementation of public policies in the interests of the population, ONG 3D is committed to promoting access to information and citizen participation, as well as transparency and budget monitoring. Through all its actions, 3D creates frameworks for dialogue and exchange at both local and national levels.

Civic and political education for all citoyenne et politique pour tou.te.s

■ The year 2022 was an opportunity for ONG 3D to build the capacity of citizens and CSOs in budgetary matters.

■ As part of the implementation of the "Civil society support program for better governance", with the participation of the Ministry of Finance and Budget, ONG 3D produced a reference document as a methodological tool for those involved in the budgetary process and monitoring. In particular, this has helped to improve the knowledge and skills of institutional players, civil society leaders and citizens alike, with regard to revenue and expenditure at state and local level.

■ Over the course of 2022, ONG 3D has set up several training programs through the "Communication and advocacy project for a fairer and a more equitable tax system" (IBP Tax Justice) with IBP, "Kaddu Jigeen Ni" with Hewlett Foundation and the " Strengthening Good Practices and Citizen Mobilization for Public Policies to Reduce Inequalities in Sahel Program" with OXFAM.

Training for MPs, journalists and civil society activists, to create a bridge between representatives of the people and CSOs as part of the Sahel - A Égalité program, February 18th, 2022.

■ For example, under the first project, the capacities of vulnerable groups, particularly women, young people and disabled people in the commune of Wakhinane Nimzatt, were strengthened in terms of participatory budgeting, decentralization and citizen participation and involvement. As a result, participants gained a better understanding of the budget planning, programming, monitoring and evaluation chain.

Mobilizing the population and CSOs in the budgetary process

■ Community capacity-building on the budgetary process is essential for better citizen participation. During the workshops set up by 3D, citizens were able to express their needs and concerns regarding budgetary matters, and these were heard by local authorities in order to take them into account when drawing up the next budget. The workshops also provide an opportunity to build the capacity of communities and local elected representatives in this area.

■ ONG 3D participated in the creation and revitalization of the Doumga Lao town council's consultation and exchange framework in the implementation of the project "Promotion of the human right to food and empowerment of rural women in Doumga Lao commune in the face of the impact of the COVID-19 pandemic". The mayor's budget is therefore participatory: in preparation for the annual budget vote, the executive committee identifies and prioritizes the needs of the population, which are then presented to councillors during the budget orientation debates.

Training workshop for local elected officials and community players on tax issues, by ONG 3D and IBP, Rufisque, November 16th, 2022.

FOCUS - Perspectives for 2023

Civil society action program for better governance

Once the regional focal points have been set up, regular meetings will be held with the national coordinator to coordinate and monitor action plans. In addition, training courses on budget analysis and monitoring, public policy evaluation and investment monitoring will be organized to build the capacity of civil society members.

THIÈS: Training community and educational stakeholders in the local budget process, 14th September 2022.

Towards a National Framework for Citizen Participation in the Budget Process

■ While the NGO 3D has strengthened citizen participation and commitment at local level, its intervention goes even further with the "Programme d'appui à la société civile pour une meilleure gouvernance", where it is working towards the creation of a National Framework for Citizen Participation in the Budgetary Process, including women and young people. To date, only discussions have been initiated with CONASUB and RTCB, but the ultimate aim will be to set up a national federating framework for CSOs on consultation, participation and advocacy for transparency and budget monitoring in the implementation of public policies.

A more inclusive and transparent budgeting process geared to a more efficient and balanced distribution of resources

■ To support Senegal's accession to the Open Government Partnership (OGP), a joint national committee of government and civil society representatives, including ONG 3D, has been set up. Expected outcomes include access to information, transparency of public action, citizen participation and accountability of public actors. A National Action Plan (NAP) is currently being drawn up. ONG 3D is mobilizing to ensure that the NAP's commitments, defined in three areas, are respected:

- Improving transparency in public management and access to information ;
- Improving access to public services and the quality of services rendered to users ;
- Strengthening citizen participation and commitment.

■ In November 2022, 3D took part in the regional meeting of the Africa and Middle East PGO in Marrakech, demonstrating its determination to influence the budgetary process in the interests of transparency and accountability of public institutions.

Through the implementation of these various projects and programs, the NGO 3D contributes to the consolidation of governance and a democratic state geared towards promoting the interests of the people, as set out in strategic axis no. 1 of the 2018-2023 strategic plan.

FOCUS - 2023 Perspectives

2023 will also be an opportunity to create periodic interactions by establishing a partnership between the Directorate General of the Budget (DGB), IBP and 3D, in order to make budget information more accessible and establish a fruitful dialogue between the State and citizens around the budgetary process. The aim of this partnership is to improve the visibility and transparency of the budget in the interests of the population.

Meeting between the PAGOF delegation and the NGO 3D, October 20th, 2022.

■ On Thursday October 20, 2022, a delegation from the French Open Government Support Program was received by the CSO members of the OGP committee. The meeting was an opportunity not only to present the initiative, but also to share the draft National Action Plan in order to gather needs, recommendations and suggestions for improvement with a view to its validation. The aim is to ensure compliance with the principles of the OGP, which are transparency of public action, citizen participation, integrity and accountability, access to information and the use of new technologies to promote openness and accountability.

ELECTORAL MATTERS: CONSOLIDATING POLITICAL AND DEMOCRATIC GOVERNANCE IN SENEGAL

PROGRAM « NIETTI ELECTIONS »

- **Period:** December 2021 - June 2024.
- **Funding partners:** USAID, National Democratic Institute (NDI).
- **Beneficiaries:** The Senegalese population.
- **Implementation partners:** Collective of Civil Society Organizations for the Elections (CCSOE or COCSE in french).

Through this program and in partnership with CCSOE, ONG 3D is mobilizing to ensure that the Senegalese population respects democracy and peace during the electoral process, and in particular with a view to the 2024 presidential elections.

Objectives

- Strengthen political dialogue and support election management bodies ;
- Civic education of citizens ;
- Improve the transparency of elections.

Completed activities

Establishment of a monitoring and alert system at all stages of the electoral process:

- Short- and long-term observation of the legislative and territorial election process.

Citizen awareness campaigns for legislative and territorial elections.

Mediation activities to support political dialogue.

ONG 3D is the first CSO to have observed the territorial elections in Senegal, in January 2022.

1,384,000 citizens reached by awareness campaigns.

Departmental workshop on the evaluation of CCSCOE (COSCE) citizen observation, November 9th, 2022.

FOCUS : Perspectives for 2023

ONG 3D will take actions to:

- Support dialogue between political players;
- Strengthen citizens' civic and electoral education ;
- Promote peace for a peaceful election;
- Raise awareness for massive citizen participation in the February 2024 presidential election.

GENDER ISSUES : STRENGTHENING WOMEN'S LEADERSHIP AND PARTICIPATION IN DECISION-MAKING BODIES

■ While women are essential to the life of a community, region or nation, they are still under-represented in society. With men generally taking on the role of managing public affairs, it is now essential for women to assert their leadership at the economic, social, political and cultural levels. The full and equitable participation of women in all aspects of society is a fundamental right that ONG 3D intends to defend. Indeed, through the implementation of numerous projects, the ONG 3D reinforces women's participation in the public sphere and their political and community leadership.

Management committee of the agricultural processing center, run entirely by women in Nyassia and Enampore, January 11th, 2022.

FOCUS: Course themes

- Economic and political leadership
- Conflict management
- Administrative and financial management
- Women's rights, gender equality and gender
- Budgetary processes
- Electoral processes
- Functioning of public institutions
- Group organization and management
- Literacy
- Development of personal and interpersonal skills

Towards decision-making bodies that are more representative of women

■ The various activities implemented in 2022 have enabled us to strengthen the effective participation of women's promotion groups (WPG) in local governance, notably within water management committees or communal consultation frameworks.

■ Training courses for women help build their capacities so that they acquire the knowledge they need to make their voices heard in decision-making bodies. ONG 3D has taken actions to enable women in various Senegalese communes to take part in decision-making bodies, thereby strengthening municipal governance from a gender perspective.

2007

Women whose leadership and participation have been directly strengthened

Thanks to all these actions, ONG 3D is in line with its strategy for the promotion of gender and social inclusion adopted in 2022. For the year 2023, it will strive to go even further by strengthening women's leadership not only locally, but also nationally.

OUR ACTIONS TOWARDS NATURAL RESOURCE GOVERNANCE AND SUSTAINABLE DEVELOPMENT

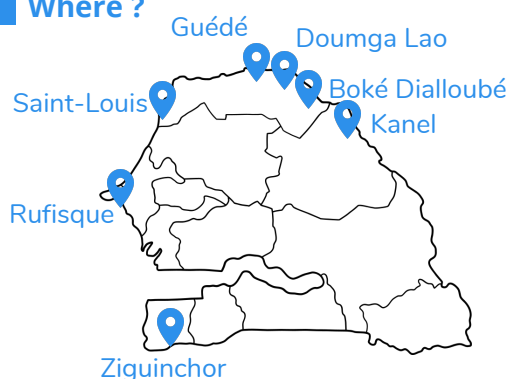

Sustainable Development Goals
directly involved

PROMOTING THE EXERCISE OF HUMAN RIGHTS TO WATER, SANITATION AND HYGIENE

■ Number of projects : 8

■ Where ?

■ Funding partners : Generalitat Valenciana, Agencia Española de Cooperación Internacional para el Desarrollo (AECID), Ajuntamiento de Barcelona, Agencia Andaluza de Cooperación Internacional para el Desarrollo (AACID), AEXCID.

■ Implementation partners : Fondation Musol, Enraiza Dérechos, Agence Régionale de Développement (ARD), Agence Nationale de Conseil Agricole et Rural (ANCAR), Communes de Doumga Lao, de Guédé Village et de Boké Dialloubé, Brigade des puits et forage de Ndioum, Brigade de l'hygiène, GIE et GPF.

■ Main activities :

- Construction of standpipes (25);
- Setting up water management committees (15) and hygiene committees (10);
- Training of committee members in administration, accounting, upkeep, cleaning, maintenance and hygiene;
- Construction of water towers (3);
- Construction of drinking water supply networks (3);
- Construction of school latrines (52) ;
- Rehabilitation of school latrines (17) ;
- Construction of household latrines (202);
- Awareness campaigns (5).

Training workshop for water management
committee members, August 11th, 2022.

Greater access to drinking water to improve living conditions for rural populations

■ Through the construction of new infrastructure (water towers, standpipes, conveyance networks, latrines), ONG 3D promotes access to the drinking water network, thereby reducing the time spent fetching water. Access to sanitation and hygiene conditions are also improved. 3D is deploying its efforts in several areas of Senegal (6), as access to water is of paramount importance to the population, and is indispensable for reinforcing the right to dignity, the right to education, the right to better health...

■ For example, the "Promotion of Human Rights to Water and Sanitation to combat the COVID-19 pandemic with a gender and climate change approach in the Rufisque department" project helped reduce the rate of water-borne diseases in the region. In the same vein, this project helped improve hygiene conditions for girls at school by rehabilitating school latrines in certain Rufisque EST establishments, separating the men's and women's cubicles, and building toilets to better manage menstrual hygiene for young girls.

■ As part of the project "Comprehensive local development of the Podor Department by facilitating access to drinking water for multiple uses: sanitation, hygiene, nutrition and agricultural production", 3D has promoted the construction and rehabilitation of school latrines, improving the living and educational conditions of schoolgirls and students. In some rural areas, young girls had explained that lack of access to water and poor sanitary conditions could prevent them from going to school when they were menstruating. As a result, these actions help to keep girls in school and empower them for a better future.

RUFISQUE-EST: Construction of water access infrastructures in two schools, September 1st, 2022.

Strengthening local governance: permanent and sustainable solutions

■ In addition to building infrastructure, 3D's initiatives are part of a sustainability approach, thanks to the creation of water management committees and training courses on various topics such as hygiene or the adoption of best practices related to water and sanitation, climate change and energy, administration, maintenance, cleaning...

■ While these training courses benefit committee members, they also aim to build the capacities of local elected representatives and CSOs. The mobilization of local stakeholders ensures the continuity and sustainability of 3D's actions, and strengthens local governance. Though the "Promotion of human rights to food and water in the most vulnerable communities of the Ouro Sidy commune in Kanel" project, 300 people benefited from capacity building to improve their techniques in terms of water resource management and use.

Through these actions, ONG 3D aims to improve the health and living conditions of populations, while promoting sustainable development through local governance of water resources, as set out in axis 2 of the Strategic Plan.

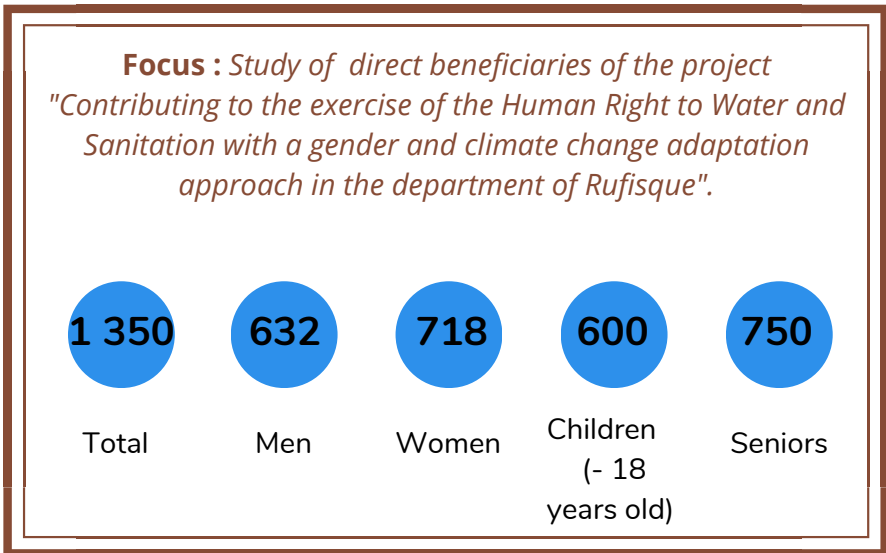

■ The Spanish Cooperation visited the GAWDI CONVENIO 18-CO1-1244 program and magnifies the intervention of ONG 3D in the Podor department, October 17th, 2022. The following projects were completed:

- A 150 m³ water tower 20 m high ;
- A 19.5 km extension to the drinking water supply network, with 9 standpipes and 2 cattle troughs ;
- A 1,500 m² market garden and forage area connected to an irrigation network with 3 irrigation basins ;
- A block of latrines with access to water in the Kodirolel public elementary school, equipped with a space for managing girls' menstrual hygiene;
- Home latrines for 40 vulnerable households.

31 749

Total number of direct beneficiaries of all projects to improve access to water, sanitation and hygiene.

Bambilor awareness campaign, April 1&th, 2022.

■ The volunteers criss-crossed the streets of Bambilor to raise community awareness of the importance of adopting water and sanitation-related hygiene measures in the context of Covid-19.

Towards improved agricultural production

■ The actions undertaken by ONG 3D to improve access conditions and management of water resources promote sustainable agricultural production. In this way, they help to improve the food and nutritional security of populations.

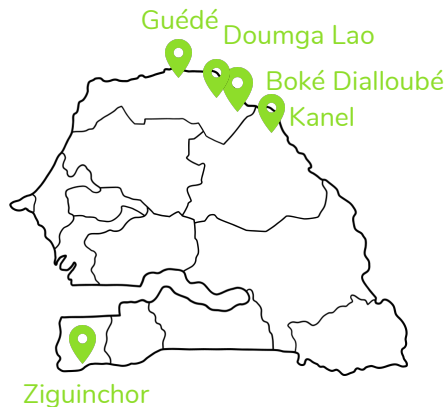

PODOR: GAWDI program achievements, June 7, 2022

IMPROVING FOOD AND NUTRITIONAL SECURITY AND PROMOTING POPULATION RESILIENCE

■ Number de projects : 12

■ Where ?

■ Funding partners ds : Generalitat Valenciana, AECID, AACID, AEXCID, Ayuntamiento de Madrid, Junta de Andalucía, Ayto de Valencia.

■ Implementation Partners : Fondation Musol, Enraiza Dérechos, ARD, ANCAR, Collectivités territoriales, Economic Interest group (EIG)et WPG..

■ Main activities :

- Planning, development and rehabilitation of market gardening areas (**Development of 109 hectares through 19 market gardening areas**);
- Installation of irrigation systems (**13**) ;
- Distribution of inputs to **587 women** ;
- Supply of agricultural materials and equipment ;
- Training (production techniques, product diversification and conservation, plot management, etc.) for **1404 women**.

PODOR: Distribution of inputs to farm women, June 7th, 2022

PODOR: Development and installation of a nursery.

Better access to healthy, varied food

■ The actions carried out by ONG 3D in terms of nutrition and improved access to water have helped to boost agricultural production. In fact, 3D promotes capacity-building by equipping populations, and more specifically WPGs, with cultivation inputs, usable arable land and efficient farming techniques.

■ In 2022, through the project "Promotion of human rights to food and water in the most vulnerable communities of the commune of Ouro Sidy in the department of Kanel, Senegal", ONG 3D mobilized through various actions including: capacity building for 300 people and literacy training programs for 200 people, then improving access to drinking water for 525 people and finally, the development of 4 market gardening perimeters of 2,400 m². These actions resulted in the harvesting of 118,250 tonnes of cereals. The impact on the population has been very positive, with the food coverage rate rising from two to six months, and a sharp reduction in the time women spend fetching water and in water-borne diseases.

Strengthening the resilience of local populations to climate change

■ Through these projects to combat malnutrition, ONG 3D is strengthening the resilience and adaptability of local populations in the face of climate change. Indeed, Senegal is sensitive to rainfall, temperature changes and droughts, impacting crops and agricultural production. Through training workshops, ONG 3D raises awareness among populations and local authorities on climate change issues and provides environmentally sensitive equipment and materials.

RUFISQUE-EST: Capacity-building for elected representatives and local civil society players, August 31st, 2022.

■ In addition, through the "Program of improving of the nutritional situation of the population of the Podor department, by facilitating access to water, hygiene, sanitation and food security", 3D has connected 4.3 hectares of market gardening perimeters in the Jéri zone to drinking water supply systems for multiple use. These projects have enabled WPGs in the communes of Boké Dialloubé, Doumga Lao and Guédé Village to become active in off-season production, thereby reducing their dependence on rainfall.

Improving participatory, gender-sensitive local governance in the agricultural sector

■ The projects implemented to improve food security are also an opportunity to build the capacities of community stakeholders and local elected representatives. Ultimately, this helps to improve governance of the agricultural sector by local authorities. In addition, during these training workshops, the emphasis is on the integration of a gender-sensitive approach by these actors in their approaches and policies.

■ Through the two programs implemented in Nyassia: "Promotion of human rights to food and empowerment of rural women in the Nyassia district as a form of resilience to the effects of the covid-19 pandemic" and "Socio-economic and political empowerment of the populations of the Nyassia district", two joint consultation frameworks have been set up. In addition, 118 people (including 66 women and 52 men, divided into 86 leaders and 32 elected representatives) received training in human rights, women's rights and gender policies, enabling them to adopt a gender-sensitive approach.

Workshop to promote active local democracy in Podor, December 19th, 2022.

ONG 3D is acting in line with the 2018-2023 Strategic Plan, and is therefore working towards the expected results, which include the resilience of production systems, the adaptation of agricultural practices or the strengthening of the knowledge of elected representatives and producers in the face of climate change.

Focus : Nutrition Reinforcement Program in Ziguinchor and Kanel

■ In Ziguinchor and Kanel, the Nutrition Reinforcement Program has been implemented to improve nutritional practices and thus eradicate malnutrition. Indeed, these regions are experiencing disruptions linked mainly to economic factors. In particular, the program targeted children under the age of five and pregnant and breast-feeding women. It has created a collective response to malnutrition, involving not only the local population but also the administrative authorities and various partners. Indeed, the implementation strategies consist in deploying an operational mechanism in partnership with the community, administrative authorities and decentralized services.

■ In order to combat malnutrition, the NGO 3D has implemented various actions that have helped to improve the food and nutritional security of populations in these regions. Indeed, 4 screening campaigns for acute malnutrition were carried out among children aged 6 to 59 months. In addition, a social mobilization campaign has been carried out, and monthly educational talks have been organized, bringing together a total of 11,682 participants. The results of this program are positive and very promising. For example, 97.74% of children suffering from moderate acute malnutrition have been treated, and 83.9% of children have gained an adequate weight (against an expected 80%).

STRENGTHENING FOOD AND NUTRITIONAL SECURITY BY INTEGRATING WOMEN INTO PRODUCTION AND FOOD PROCESSING SYSTEMS

A stronger production system for women farmers

■ In the departments of Rufisque, Podor, Kanel and Ziguinchor, ONG 3D is helping WPGs gain access to arable land through 13 projects. Through various training courses, they have become aware of their place and value in the cultivation of land, and have thus become involved in production systems.

■ In order to strengthen their production capacities, 3D has provided them with agricultural inputs, as well as market gardening perimeters available for agricultural production and equipped with appropriate irrigation systems. In addition, literacy training has been organized, as well as training in the management of production plots and in the production and conservation of agri-food products.

■ As part of the "Project to improve the incomes and productive capacities of 457 women in the commune of Boké Dialloubé faced with the socio-economic impact of Covid-19", the WPGs received training in production, marketing and sales techniques, as well as in leadership and administrative and financial management. ONG 3D also supported the construction and supply of equipment for a cereal processing unit. The results have been particularly positive, as the women have seen an increase in both their agricultural production and their incomes.

Improving the production capacities and techniques of women's EIG in these regions is part of an effort to strengthen women's economic empowerment. ONG 3D is committed to helping women achieve economic emancipation through the production, processing and marketing of agricultural products.

Improving WPG resilience by strengthening livelihoods

■ Women's agro-processing units have been set up to enable women to design agri-food products suitable for sale. In this respect, the actions of ONG 3D have enabled them to receive training in processing techniques, as well as providing them with the equipment they need to carry out such an activity.

■ In addition to improving food availability, the aim is to boost women's and households' incomes through the sale of these processed products. A marketing platform bringing together the women's processing circles of Podor and Rufisque has therefore been implemented to encourage exchanges of products between member associations, while developing a common marketing policy. Trade fairs were organized to promote the sale of products throughout Senegal.

FOCUS : Perspectives for 2023

To date, the results of the Commercial Platform's efficiency are relative, mainly due to malfunctions and a lack of harmonized rules. The year 2023 will therefore provide an opportunity to revitalize the platform and ensure genuine commercialization, with the ultimate aim of strengthening the empowerment and economic emancipation of women producers and processors.

1404

Women trained in production, preservation and processing techniques.

451

Podor, December 13th, 2022.

■ Two trade fairs, initiated by 3D, to promote and enhance the value of local products processed by women's units.

Nyassia, Ziguinchor, June 24th, 2022.

OUR ACTIONS TO PROMOTE FUNDAMENTAL SOCIAL RIGHTS FOR THE POPULATION

■ In general, ONG 3D's various projects help to ensure respect for fundamental social rights. Whether they are implemented within the framework of strengthening governance in budgetary or electoral matters, or those implemented within the framework of improving access to water, sanitation and hygiene, and strengthening food and nutritional security, they all tend towards promoting the fundamental rights of populations. At the same time, ONG 3D implements specific projects that strengthen the rights of communities.

Project "Dekkil Yaakar"

■ **Where ?** Ndiébene, Kayar, Mbour.

■ **Funding partner s :** GIZ.

■ **Objective :** Offer new employment opportunities to returning migrants and young people at high risk of immigration.

■ **Beneficiaries :** 150 direct beneficiaries + 3,000 awareness-raised individuals..

■ **Activities :**

- Mapping study of the reference situation of 589 people ;
- Facilitation of a community forum ;
- Collection of partners' opinions and suggestions on the approach to implementing activities ;
- Reflection on an intervention strategy capable of influencing local and national public policies on the management of the migration phenomenon ;
- Capacity-building workshops in leadership, personal development and self-esteem, entrepreneurship and business creation ;
- Creation and formalization of 10 EIG groups active in agriculture, livestock, fishing and processing groups active in agriculture, livestock, fishing and processing.g .

■ **Impacts :** The achievements of this project have helped to improve personal and professional potential of young beneficiaries, and strengthen the knowledge, skills and attitudes required for entrepreneurship, while promoting collective and female entrepreneurship.

■ **Perspectives for 2023 :** The actions of ONG 3D have enabled us to learn a number of lessons, including the importance of psychological support. A technical and psychological support mechanism will be set up for returning migrants. Advocacy will also be carried out to facilitate access to financing for young people in the three communes.

Youth training workshop in Mbour, November 17th, 2022.

Project "CAP SANTE NPI"

- **Where ?** Saint-Louis et Thiès.
- **Funding partners :** Palladium.
- **Implementation partners :** RESOPOPDEV
- **Objective :** Lead the State of Senegal to carry out legal reforms to register, by 2024, a disaggregated health budget line in the budget nomenclature of local authorities that support the Sexual and Reproductive Health of Adolescents and Young People (SRHAYP).
- **Target groups :** Ministry of Local and Regional Authorities, Planning and Development ; Ministry of Health and Social Action ; Ministry of Finance and Budget; Local and Regional Authorities.
- **Beneficiaries :** Young people and adolescents.
- **Activities :**
 - Development of a literature review;
 - Situational analysis of the health budget line of local authorities;
 - Restitution and training workshops.
- **Impacts :**
 - Appropriation of the advocacy strategy by local authorities for better consideration of SRHAYP ;
 - Commitment by some local authorities to increase funding for SRHAYP in their budgets.
- **Perspectives for 2023 :**
 - Advocacy for financing adolescent and youth health ;
 - Drafting of an inter-ministerial decree.

Restitution workshop for the situational analysis of the local authority health budget line in Saint-Louis, October 26th, 2022.

Project "Laabal Rewbe"

- **Where ?** Saint-Louis.
- **Funding partners :** Netherlands Embassy.
- **Implementation partners :** Yeewi Association.
- **Objective :** Promoting access to health and education through good menstrual hygiene management among young girls in the Saint-Louis region.
- **Target groups :** Ministry of Health, Ministry of Education, Parent-Teacher Associations, Local Authorities...
- **Beneficiaries :** Young girls (3,000 direct beneficiaries).
- **Activities :** Training, awareness-raising and communication campaign on good menstrual hygiene practices.
- **Conclusions :** Through its achievements, ONG 3D has highlighted the absence of budget lines dedicated to the promotion of menstrual hygiene, which then accentuates the risk of menstrual precariousness.
- **Perspectives for 2023:** Advocacy for Saint-Louis authorities and the Senegalese National Assembly, for the passing of a law on free sanitary protection in establishments catering for women and girls.

Awareness-raising workshop on menstrual hygiene promotion in a high school, May 28th, 2022.

FOCUS : National Malaria Advocacy Action Plan

In 2022, ONG 3D in partnership with Speak Up Africa and the National Malaria Control Program (NMCP) launched the National Malaria Advocacy Action Plan to help increase the level of engagement of corporate private sector decision-makers in increasing the resources allocated to the fight against malaria.

■ Meeting between ONG 3D, NMCP and Speak Up Africa to monitor the implementation of the National Advocacy Action Plan, November 21st, 2022.

■ HEALTH: 3D advocates for funding to fight malaria : Kédougou mining companies commit, November 29th, 2022.

PERSPECTIVES FOR 2023

- If the actions undertaken by ONG 3D in 2022 are in line with its 2018-2023 strategic plan, in 2023 it will continue its efforts to achieve positive and sustainable results for the population.
- In budgetary matters, the emphasis will be on strengthening collaboration with the Ministry of Finance and on State support to finance distributive social policies.
- On the electoral front, 3D will be working to create a climate of peace in the run-up to the 2024 presidential elections, with massive voter turnout.
- At the end of 2022, 3D has set itself a new challenge: the transparent management of incomes from extractive resources, as part of the TRACES Program (Transparency and accountability in the extractive sector), financed by USAID and in partnership with Forum Civil. The objectives are also to strengthen community involvement and incomes and to consolidate the role of the media and civil society in this area. In 2023, ONG 3D will implement various actions to improve the management of revenues from natural resources by promoting the interests of communities.
- As part of the governance of natural resources and sustainable development, 3D will continue its efforts to strengthen the resilience of populations in the face of climate change, in order to improve their living conditions, particularly in terms of access to drinking water and nutritional security.
- In 2023, 3D will continue to implement its gender strategy to strengthen women's leadership and economic empowerment. Through its various programs, 3D will continue to fight against gender discrimination and inequalities between women and men.
- The year 2023 will also be an opportunity for ONG 3D to strengthen its collaboration with its partner organizations and create new partnerships.

THANK YOU to all the people and organizations who work with ONG 3D on a daily basis to support the advent of plural, democratic societies open to the world. Together, let's continue to take actions to defend people's interests and strengthen their fundamental rights and living conditions.
